Additional Info:

ASI-077 modifies many column lines and benchmarks. This change order reflects work associated with the removal of the concrete beam and new framing in association with that removal. Some members were relabricated to fit with the new steel beam. Changels were added to support the mod deck. Modifications had to be completed prior to the start of ejection. For work associated with dimensional changes see \$ X027828

## MIDWEST STEEL

2525 E. Grand Blvd. Detroit, MI 48211 · 313-873-2220 · 313-873-2222

February 5, 2025

Stone Bridge Iron & Steel, Inc. 426 Purinton Rd. Gansevoort, NY 12831

Attn: Mr. Brian Carmer

RE: Airport Terminal Expansion

Albany, NY

BP-02 - ASI-077 / CCA-026, R3

Dear Mr. Carmer,

We are pleased to submit our quotation for scope changes per the documents issued under ASI-077 for the above referenced project. This pricing also includes the added work shown in RFI-238, and the connection details issued under LERA SK-37 and the Ryan Biggs Clark Davis "ASI77 Connections" calculation package.

Pricing Impact:

-Steel Start Schedule Delay due to this ASI - \$42,459

Additional work per this ASI \$14,098

Total \$56,557

Schedule Impact:

Adds (1) day to setting face plates; adds (2) days to Seq 1. Adjusts

steel start date.

This quotation is based on the following:

1. Field work scope included with ASI-077 design drawings:

- a. Install W18x50 along G-E.8/G-17 to G-18 with welded shear tab connections to added face plates. New bolted connections for (2) W12x16 beams framing into W18. Anchor bolt survey for relocated columns.
- b. Credited hours for (4) small face plates and welded shear tab connection when beam was concrete.
- 2. Field work scope included with RFI-238:
  - a. Install (3) MC8x18.8 deck support channels between the (2) W12x16 beams. Connections for MC8x18.8 per RBCD connection package.
  - b. West face plate connection for W18x50 per LERA SK-37.
  - c. East face plate connection for W18x50 per RBCD connection package.
- 3. Excluded:
  - a. All demo work shown.

- b. Any steel field work modifications associated with dimensional changes shown. All rework of steel excluding what is listed above to be completed in the shop.
- c. Setting of post installed anchor rods.
- 4. Steel Start Delay:
  - a. This design change impacted the steel fabrication leading to a (9) day delay to the steel start date, from Sept. 3, 2024 to Sept. 16, 2024. Our Superintendent, General Foreman, and (2) Foremen were already actively working on this project and in the secure badging process in preparation for the Sept. 3 start when this design bulletin was released on Saturday Aug. 24, 2024, and therefore the (2) week delay to our start has extended their duration on this project. This (2) week period included a holiday, so the pricing was only calculated based on the (9) work days pushed.
  - b. This design change impacted the concrete work at the elevator tower, leading to an additional (1) week delay to the completion of the face plates and shear tab welds. Our Foremen will have production work they can complete during this time, but our Superintendent and General Foreman have the total time duration extended onsite.
- 5. MLB to provide clean, flat surface at demo'd concrete that is suitable for the new face plates to be installed. As of 9/17/24, the demo'd concrete beam ends will not be sufficient for the face plate installation.
- 6. This quote is based on all the conditions of the base contract work.

We thank you for the opportunity to submit our quotation and we look forward to a contract change order for this work.

Sincerely,

Carly Mansfield Project Manager

#### Craig,

I had Midwest revise their proposal so the manlift matched the manhours. That should address Truner's concerns. In response to question 2 from Turner, the stiffeners are required to hold the WT from moving during the welding process. Without the stiffeners, the WT would roll approximately 10 degrees from the weld shrinkage.

Let me know if you have any further concerns.

#### Craig-

My comments below still apply:

- 1. The labor and lift times do not align Midwest is working 10 hour days, 2 lift days is 20 hours and there are 22 man hours.
- 2. What is the purpose of the stiffeners?
- 3. Revised detail is for both level 2 and level 3 RFI is only for Level 3, can you clarify why there is a detail for Level 2 in this pricing. No explanation required...I explained this to him already.

RE: Airport Terminal Expansion

Albany, NY

BP-02 - Turner RFI-249 / CCA-031 - R2

Dear Mr. Carmer,

We are pleased to submit our quotation for scope changes per the documents issued under Turner RFI-249 and the weld detail sketch issued by SBIS for the above referenced project.

Pricing Impact: \$3,502

Schedule Impact: (1) day to Seq. 7, (1) day to Seq. 8

This quotation is based on the following:

- 1. Turner RFI-249
- 2. Field work scope includes:
  - a. Labor and equipment to weld CJP and PJP welds at WT4x29 (piecemark 7B54) and WT5x44 (piecemark 8B63) as shown on weld detail sketch by SBIS.
- 3. Credit for field work scope includes:
  - a. Labor and equipment to weld 5/16" fillet weld on both sides of the two WTs per detail I/S-504
- 4. Firewatch is included for all hot work.
- 5. This quote is based on all the conditions of the base contract work.

We thank you for the opportunity to submit our quotation and we look forward to a contract change order for this work.

Sincerely,

Carly Mansfield Project Manager

Question

Question from Brian McNeil Turner Construction Company on Thursday, Sep 12, 2024 at 10:54 AM EDT

Due to existing duct work and block wall for Stair C, northside connection welding will not be possible. Please provide alternative structural attachment.

**Attachments** 

Duct Work Block Wall Conflict On site.PNG, Duct Work Block Wall Conflict.PNG

Awaiting an Official Response

### LERA Response (09-13-2024)

At locations where welding access to the North side of the WT is blocked by existing construction, revise the double sided fillet weld to a one sided groove weld of equivalent capacity.

The web thickness of the WT is approximately 5/8". A PJP weld requires at least 1/8" landing, so maximum preparation depth is 5/8" - 1/8" = 1/2". Maximum effective throat (E) is S-1/8, therefore the maximum effective throat for the PJP weld is 3/8".

For the detailed intermittent 5/16" double fillet (3" long at 12" on center), provide intermittent 3/8" effective throat PJP welds (4 1/2" long at 12" on center).

For the detailed continuous 3/8" double fillet welds (12" long at each end of the WT), provide continuous one-sided CJP welds (12" long at each end of the WT).

Per NOC 104 dated 1/25/2025, MLB Construction Services LLC is pleased to present our proposal for the following:

PCO-161 was generated to sawcut the existing foundations and removal of the material for foundations believed to be separate per the record drawings. Additionally, there was additional handwork around existing utilities/ductbanks that passed through these foundations.

### **Request For Information**

To: Jeffrey Lino

MLB Construction Services One Stonebreak Road Malta, NY 12020 CC: Patrick Pratico

MLB Construction Services

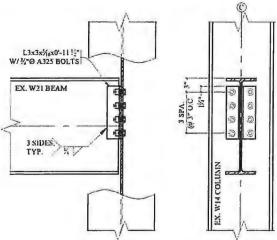

ubject: Terminal Existing Conditions Reinforcing Requirements Part 2

Sent Via: Email

### **Requested Information:**

Drawings S-102T and S-103T identify W21 beams framing to the column webs that require reinforcing of the existing connections.

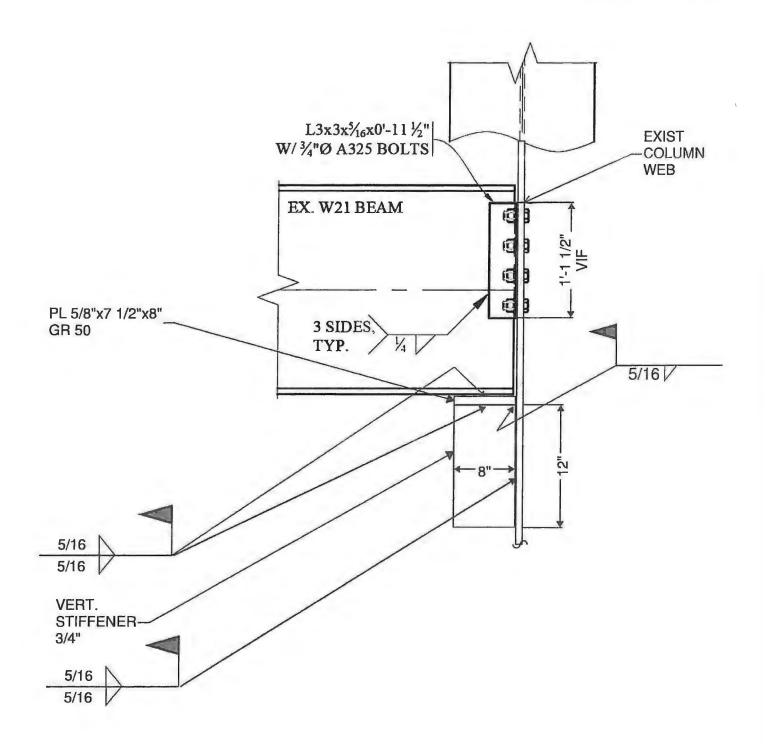

Field verification has determined that these are double-angle connections, welded to the beam and bolted to the column (see below) and not the bolted-bolted double angle connection as assumed in the detail J/S-503.

Additionally, due to MEP access to these locations is limited.

Please advise on how to proceed.

The information requested above is crucial to the completion of the project. Please respond by 9/19/2024. If the requested response time is not met, the project may be delayed.

All transportation charges from point of delivery to destination and return charges to the point of delivery are to be paid by the Lessee.

The Lessor reserves the right to assign its interest in this agreement without Lessee's consent and the Lessee agrees that such assignee may succeed to and be entitled to exercise all of the rights of the Lessor. Such assignee's rights shall be free from all defenses, oitsets, setolits, recoupments, or counter claims which Lessee may be entitled to assert against Lessor. No such assignee shall be obligated to perform any duty, coverant or condition required to be performed by Lessor under the terms of this agreement.

The Lessor is not the manufacturer of the equipment on the agent of said manufacturer. The Lessor makes no warrantiles either express or implied, including without limitation any warranty of merchantability or fitness for any particular purpose, with respect to the equipment unless endorsed herein in writing. Lessor does not undertake any responsibility with respect to the ordering, manufacturing, purchase, delivery, assembly, installation, testing, operation or servicing olithe equipment. It, in the good faith opinion of Lessor, there should be any material discrepancy between the equipment as described herein and the equipment as described herein and the equipment as described herein and the equipment as described herein and the equipment as described herein and the equipment as described herein and the equipment as described herein and the equipment as described herein and the equipment as described herein and the equipment as described herein and the equipment as described herein and the equipment as described herein and the equipment as described herein and the equipment as described herein and the equipment as described herein and the equipment as described herein and the equipment as described herein and the equipment as described herein and the equipment as described herein and the equipment as described herein and the equipment as described herein and any right of set-off or recoupment, for any loss, damage, or expense (including, without limitation, any including sequence recoupment, for any loss, damage, or expense (including, without limitation, any including admanges) of any kind caused or related to the use, inability to use, or attempted use of said equipment or any failure, defect or noncompliance in or with the equipment or any replacement parts, or any action or inaction or performance by the Lessor hereof or in connection with the transaction contemplated hereby. The foregoing exclusion of liability shall apply regardless of whether such liability is asserted to arise from breach of contract, negligence, strict products liability, or other tor or breach of fegal duty.

The receipt and acceptance by the Lessee of said equipment shall constitute acknowledgment that said property has been accepted, that eaid proporty has been examined, operated under ordinary working conditions, and found in good condition and repair and fit for use unless the Lessee makes claim to the contrary to the Lessor by registered mail with return receipt requested within three days after receipt of said equipment.

ordinary working containons, and round in good condition and repair and it for use unless the Lessee makes claim to the contrary to the Lessor by registered mail with return receipt of sald equipment.

This agreement is subject to the terms and conditions of the reverse side hereof, including but not limited to the applicable warranties herein. The front and reverse side together constitute the entire agreement between the parties. The Lessor's obligation to perform under this agreement is conditioned on the Lessee's compliance with the ferms hereof.

Except as provided above, this agreement cannot be cancelled or terminated by Lessee. Lessee hereby agrees that its obligation to pay all rent and other amounts payable hereunder and to perform all of its duties with respect hereto shall be absolute and unconditional under any and all circumstances and that it shall so pay and perform without abstement or reduction for any reason, including without limitation any actual or alleged present or future claim or right of setoff or recoupment that the Lessee may have against the Lessor or against the supplier, manufacturer or dealer of the equipment.

Lessee agrees that the obligations undertaken herein by Lessee are for the purposo of furthering Lessee's income-producing business or activity. We clearly understand this agreement and have read and egree to be bound by the conditions stated on the front and back of this agreement.

Lessee hereby acknowledges that Lessor has offered to him for rent Safety Equipment or devices which attach to the equipment and Lessee hereby release and discharges Lessor from any habilities which Lessee might hereafter claim against Lessor by reason of Lessor's failure to advise Lessee of the availability of safety equipment or devices.

Any changes to the scope of work contained herein and/or additional terms and conditions added by the lessor may void pricing and terms of the agreement. If such a situation arises, lessee may provide a revised agreement to reflect pricing and terms as changed

or required by the lessor. Paul Ciancanelli LESSEE (Individual, Company, Corporation, Partnership)

(Authorized Representative, Title) This lease agreement is for immediate acceptance by the Lessee, but although so accepted does not constitute a contract until same is approved by an authorized representative of the Lessor and is subject to change or withdrawal until so approved.

| hour or OT rates apply  Fuel Service can be set up by Milton CAT for a 15% Handling Fee.  Customer responsible for block heater/battery charger connections. Excessive cleaning charges will apply if necessary.  Please note - These products will need a Preventative Maintenance service performed at regular intervals of run time. Unit must be shut down for 3-4 hours to perform these services. The cost of these services will be calculated when the service is provided. The customer is responsible for all Diesel Emissions Fluids (DEF) for all Tier 4 emissions units T4(F).                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |                                                                                     |         | PM Service (per s  Total for Add Equip. & Se | itlonal          |          |        | 11.00        |  |  |

#### RENTAL TERMS AND CONDITIONS

- 1. PAYMENT OF RENT AND OTHER CHARGES. By executing this Agreement, you agree to pay rant, RPP charges (if applicable), fraight, any sales, use or other taxes or fees charged or based on the rental, use or operation, and all other charges under this Agreement upon receipt of invoices for same. For purposes of this Agreement, a billing paried is 4 weeks or 28 consecutive days. The rental rate is based on a maximum usage during the rental period delly (8 hours per day), weekly (40 hours per week) or per billing period (160 hours per 4 weeks). Excess Use Raig: If usage exceeds the indicated maximum usage, you shall pay additional rent for the rental period equal to the number of hours of excess use multiplied by an excess use rate (PER HOUR) of 1/8 of the delly charge (for a deliver) and excess use multiplied by an excess use rate (PER HOUR) of 1/8 of the delly charge (for a deliver) or 1/160 of the billing period charge (for a 4-week cental), plus applicable taxes. Late Payment: If you fall to pay within 10 days after payment is due any amount required to be paid to Lessor, you shall pay Lessor Interest on that amount at two percent (2%) per month. Figeight: You are responsible for all transportation charges from point of delivery to destination and return charges to point of delivery. Overtime Charges: You shall pay Lessor its customary overtime charges for services provided at your request outside of normal working hours (7:00AM-5:00PM, Mon-Fri). Refueling Service charge for the number of gallons required to refill tank(s) at the time of return.
- 2. TERM. The term of this Agreement shall commence on the date the Equipment is delivered and on the later of (a) the date the Equipment is returned to Lessor or (b) and of the initial rental period, if you keep the Equipment after the end of the initial rental period, thus Agreement shall continue on the same terms and conditions on a day-to-day basis until terminated by Lessor, and rent end other charges will be proreled based on the number of doys you keep the Equipment past the end of the initial rental period. Lessor may terminate rentel at any time and repossess the Equipment without further notice in case of violation by you of any terms or conditions of this Agreement.
- 3. INSPECTION, LOCATION, AND SURRENDER. By signing INs Agreement, you acknowledge that you have inspected the Equipment at time of delivery. Your acceptance and use of the Equipment constitutes your acknowledgment that the Equipment is in good mechanical condition. The Equipment shall not be moved from the job location described without Lossor's prior written consont. Lossor reserves the right at any time to inspect, rotrieve or observe the use of the Equipment. Lossor reserves the right to substitute equivalent or like Equipment willle you are renting the Equipment, upon at least 24 hours prior notice to you. You agree to roturn the Equipment to Lessor in the same condition as when you rocatived it, ordinary wear and tear excepted. Until Lossor receives accepted upon the Equipment in a safe/secure manner. Upon return of the Equipment to Lossor, Lessor will inspect the Equipment for damage. The cost of any repair or replacement required as a result of any damage, to the extent not included in the RPP (if applicable), other than ordinary wear and tear, shall be charged to you at Lessor's standard rates then in offact.
- 4. OWNERSHIP AND TITLE. At all times, Lessor shell continue to own the Equipment and the Equipment shall be titled in Lessor's name. You agree to keep the Equipment free and clear of all liens and encumbrances and shall not sell, transfer, assign, subjet or use the Equipment as security and any attempt to do shall be void and of no effect. You shall, at your own cost and expense, protect end defend Lessor's title to the Equipment against the claims and demands of all persons claiming by, through or under you.
- 5. COMPLIANCE WITH LAWS: OPERATION AND USE OF EQUIPMENT. You shall, at your own cost and expense, comply with all lawe, regulations, rules, codes, standards, ordere, requirements and manufacturers specifications pertaining to the use, operation and transportation of the Equipment. You agree that you have had access to the operation/safety manuals for the Equipment and that you will use the Equipment only within its rated capacity. Only Authorized Operator's shall use and operate the Equipment and you accept full and sole responsibility, including safety, instruction and training for any operator of the Equipment and Operator's containing for any operator of the Equipment without causing damage to the Equipment or other properly and without inflicting physical injury to himself or any other person because of his inability, inexperience or negligence. You acknowledge that the Equipment is not insulated and should not be used near power times, that the Equipment is for use only on a firm level surface, and that the use of safety guards and devices as may be required by any laws, rules, regulations or safety codes (including without limitation the Occupational Safety and Health Act and the Federal Coal Mine Health and Safety Act of 1989).
- 6. <u>REPAIR AND MAINTENANCE</u>. You agree to take proper core of the Equipment, at your own cost and expense, including: performing routine maintenance; checking all fluids and tire pressures delity, providing all fluid, lubricants, coolants and hydraulic fluids as needed, and checking and recharging batteries as needed. The pluge are not permitted in the event of a flat line. You shall not use the Equipment for any purpose other than the "Intended Use" indicated on the front page of this document. "Intended Use" does not include flood debris removal, stream channelization or use in water, awarmy conditions, marine environments such as beaches, or other similar altuations. You shall be responsible for all tire damage, excessive line wear, missing parts, any physical damage to the Equipment, and excessive or abnormal wear and tear. Excessive or abnormal wear and tear. Excessive or abnormal wear end tear will be conclusively presumed to result from neglect, abuse, improper operation, or use other than the "intended Use." You shall be charged for all lost keys and manuals and for excessive cleaning required. Except for those care and maintenance duties listed above, no person other than teasor shall be permitted to service and maintain the Equipment and you agree to make it available to Lessor for such purpose at reasonable times. If the Equipment falls to operate property or becomes in need of repetr, you shall immediately stop using the Equipment and promptly notify Lessor. You shall be responsible for any damage that results from use of the Equipment and promptly notify Lessor. You shall be responsible for any damage that results from use of the Equipment affer a defect or mailtraction has been recognized.
- 7. RISK OF LOSS AND INDEMNIFICATION. You assume and bear the entire risk of loss, that or damage of or to the Equipment, regardless of cause, whether or not the loss, that or damage is covered by incurance and regardless of any deductibles that may have to be paid. You agree to Indemnify, defend and hold harmless Lessor, its substdiaries, affiliates, officers, directors, employees, agents, successors and assigns, from and against all claims, suits, demende, judgments, actions, liabilities, losses, damages (whother to persons or property, including douth), tiens, costs and expenses, including attornay's fees, arising out of or related to your breach of this Agracoment or any use, maintenance, storage or other handling of the Equipment outside Lessor's possession. No loss, that or damage in insurance shall relieve you of the obligation to pay or perform any other obligation hereunder. You shall immediately notify Lessor in the event of any accident, personal injury or property damage in connection with the Equipment or its use.
- 8. <u>INSURANCE</u>, You shall maintein and pay for intend Marine/Equipment Floator/Leased or Rental Equipment Insurance that provides coverage against all risks of direct physical loss, theft or damage of or to the Equipment (including flood, earthquake and weight of load), for not less than the full replacement value of the Equipment, coinsurance valued. If you fall to provide Lessor with a cartificate of insurance for such coverage within ten (10) days of this Agreement, you shall be automatically enrolled in and responsible to pay for the RPP. You shall also maintain and pay for Commercial General Liability Insurance against personal injury (including death) and properly damage with limits equal to at least \$1,000,000 per occurrence and \$2,000,000 general aggregate (including per job/per location aggregate). For all insurance that you obtain (1) the insurance company shall have an AM Best rating of A- or better and be approved to do business in the state where the Equipment may be located, (2) Lessor shall be named as an additional insured and loss payee, (3) a waiver of subrogation shall apply in favor of Lessor, (4) the policy limits shall apply on a primary and non-contributory basis, (6) any maximum limit per item and applicable doductible shall be noted on the cortification(s) of Insurance, (6) the policy's cancellation or modification (15 days for non-payment of premium), and (7) you shall provide Lessor with an original policy or cortificate evidencing such insurance. You hereby appoint Lessor as your attemption—fact with power and authority to do all things required under any such policy, including but not limited to making claims, receiving payments and executing and ondorsing all documents, checks or drafts.
- BENTAL PROTECTION PLAN. In lieu of providing Insurance for damage or loss to the Equipment, you may participate in Lessor's Rehial Protection Plan ("RPP"). The RPP is a waiver of claims by the Lessor for partis covered by the RPP to the Equipment and is not "insurance" for the Lessoe. COVERAGE: Up to [\$500,000] per occurrence. If you participate in the RPP, you will have no liability to the Lessor for physical damage to the applicable Equipment up to the covered amount, except that you will remain liable to the Lessor in oil events for: (a) damage or loss caused in whole or in part by; (i) your breach of any provision of this Agreement: (ii) fallure to return Equipment; (iii) violation of manufacturers' specifications; (iv) use of any Equipment in violation of any policy of insurance; (v) civil authority/wort/errorism; (vi) contamination including mold, middew, rust, not and other contaminate, except due to a covered perit; (vii) deterioration/wear and lear; (viii) pollutante or environmental hazards; (ix) uncorn hazard; (ix) temperature/frumdity; (ix) errimatiffrauditen/dishenes/fliegal excit. (ix) intentional misuse or reckless conduct; (xiii) mechanical breakdown; and (b) damage to thes, unless caused by a covered perit. DEDUCTIBLE: In the event of a claim, you will be responsible for the deductible in the amount of \$2,500 [per courrence]. COST: If you elect to participate in the RPP, you agree to pey Lessor; 15% of the rental contract value to cover rented equipment. COVERED PERILS: All risk coverage including, but not limited to, (a) socidental damages; (b) collisions; (c) overtures/rollovers., (d) failing objects; (e) fire; (f) thefi; (g) vandalism; (h) flood; (i) earthquake; U) hall; (k) wind; (i) tornado; (m) other non-excluded perits. SUBROGATION: Lessor will not subrogate for portis covered under the RPP.
- 10. DEFAULT, LESSOR'S EXPENSES, ETC. If you fall to pay any rent or other amount whon due and payablo, or if you fall to observe any provision or perform any obligation of this Agreement, or if you or any guarantor becomes subject to any insolvency, bankrupley, receiverable, invalenship or similar proceeding, whether voluntary or involuntary, or if there is a material adverse change in your financial condition or the financial condition of any guarantor of any guarantor, or if any credit or financial information you provide to Lessor is not true and correct, or if any representation or warranty made by you is unline or breached, or if any guarantor does or revokes a guaranty, you shall be in default, which means that Lessor shall have the right to exercise any one or more of the following remedies: (a) terminate that Agreement and any other agreement(s) with Lessor, (b) declare the full balance of ell rent, charges and other amounts immediately due and payable without notice or domand; (c) take passassion of or rotain the Equipment, wherever located, without notice or demand, without any court order or other process of law; (d) require you to assemble the Equipment and make it available at a reasonably conventent location designated by Lessor. (e) better process of low; (d) require you to assemble the Equipment and make it available at a reasonably conventent location designated by Lessor. (e) better process of low; (d) require you to assemble the Equipment and make it available at a reasonably conventent location designated by Lessor. (e) better process of low; (d) require you to assemble the Equipment and make it available at a reasonably conventent for more unity or separately and from using the Equipment, without bond; and/or (f) pursue any other remedies, or other remedies are cumulative end may be oxerclased concurrently or separately and from time to time. Notwithstending any action Lessor may take, you shall remain responsible for full payment and performance of all obligations under this Agreement. In
- 11. <u>DISCLAIMER OF WARRANTIES AND LIABILITY.</u> Lessor is not the Equipment manufacturer and makes no warranty of merchantability or fitness for any particular use or purpose, either expressed or implied. Stone Bridge Iron & Steel, Inc. 426 Purinton Rd. Gansevoort, NY 12831

Attn: Mr. Brian Carmer

RE: Airport Terminal Expansion

Albany, NY

BP-02 - CCA-041 - ASI-100 - Demo & Replace Beams at L3 Garage - Rev 3

Dear Mr. Carmer,

We are pleased to submit our quotation for scope changes per the documents issued with ASI-100 for the above referenced project. The demo and installation has been broken out separately at the request of Turner, to allow the demo to proceed prior to Midwest Steel's upcoming demobilization from site.

| <b>Pricing Impact:</b> | Demo:         | \$ 3,901 |
|------------------------|---------------|----------|
|                        | Installation: | \$11,922 |
|                        | Total:        | \$15.822 |

#### Schedule Impact:

- (2) days to demo studs, deck, beams, and angles.
- (5) days to install beams, angles, deck, and studs. Schedule impact assumes 8hr work days, and assumes that Midwest Steel will not have downtime between demo activity and reinstallation activity (i.e. other comeback work will be available for us to install during the period of time MLB needs to prepare this area for reinstallation, or demo work will be approved and

available for us to complete prior to initial demobilization).

This quotation is based on the following:

- 1. ASI-100 Design Drawing Release
- 2. Scope of work includes:
  - a. Removal of installed metal deck and shear studs between girds X-7 and G-E.8, and G-17 and G-18.4. Assumes new metal deck will be supplied by others, and existing pieces of deck are not expected to be reused.
  - b. Removal of (3) W12x16 beams.
  - c. Removal of (3) deck support angles attached to the concrete beam that will be demoed.

- d. Removal of perimeter posts & safety cable.
- e. Installation of (2) new hand set face plates & epoxy anchors.
- f. Installation of (1) new hand set W18x35 beam.
- g. Installation of (3) new hand set W12x16 beams.
- h. Installation of new hand set deck sheets.
- i. Installation & welding of 21' of glass handrail support angle.
- j. Installation of perimeter posts & safety cable.
- k. Installation of new welded shear studs
- 3. All work associated with this CCA will be handwork, as there is no access for cranes or equipment.
- 4. Demo of concrete beam by others.
- 5. Because there will be work by others between our demo and reinstallation activities, Midwest Steel would like to complete our portion of the demo prior to our demobilization around the end of January 2025. If that is not possible, then this pricing assumes that there will be other comeback work available to our crew during the extent of activities by others.
- 6. Fire watch is included for the hot work. The hours for firewatch are incorporated into the JIW hours.
- 7. This quote is based on all the conditions of the base contract work.

We thank you for the opportunity to submit our quotation and we look forward to a contract change order for this work.

Sincerely,

Carly Mansfield Project Manager

|                             |            |          |       |   |             | Subtotal | \$31 361 65  |

See Attached Items: SBIS BOM, CCA-041R3, Deck Quote Tax (If Required) 0.00% \$0.00

Excludes: Total \$34,842.79

Additional Info:

Concrete beam to be replaced with W18x35. Connections will need to be engineered. Assumed similar connections as W18 above. (3) W12x16 will need to be removed and remade to fit the new framing. Decking will have to be scrapped and replaced. Demo costs have been broken out for early release. See X044 for demo costs.

## MIDWEST STEEL

2525 E. Grand Blvd. Detroit, MI 48211 · 313-873-2220 · 313-873-2222

January 23, 2025

Stone Bridge Iron & Steel, Inc. 426 Purinton Rd. Gansevoort, NY 12831

Attn: Mr. Brian Carmer

RE: Airport Terminal Expansion

Albany, NY

BP-02 - CCA-041 - ASI-100 - Demo & Replace Beams at L3 Garage - Rev 3

Dear Mr. Carmer,

We are pleased to submit our quotation for scope changes per the documents issued with ASI-100 for the above referenced project. The demo and installation has been broken out separately at the request of Turner, to allow the demo to proceed prior to Midwest Steel's upcoming demobilization from site.

| <b>Pricing Impact:</b> | Demo:         | \$ 3,901 |
|------------------------|---------------|----------|
|                        | Installation: | \$11,922 |
|                        | Total:        | \$15.822 |

#### Schedule Impact:

- (2) days to demo studs, deck, beams, and angles.
- (5) days to install beams, angles, deck, and studs.

Schedule impact assumes 8hr work days, and assumes that Midwest Steel will not have downtime between demo activity and reinstallation activity (i.e. other comeback work will be available for us to install during the period of time MLB needs to prepare this area for reinstallation, or demo work will be approved and available for us to complete prior to initial demobilization).

This quotation is based on the following:

- 1. ASI-100 Design Drawing Release
- 2. Scope of work includes:
  - a. Removal of installed metal deck and shear studs between girds X-7 and G-E.8, and G-17 and G-18.4. Assumes new metal deck will be supplied by others, and existing pieces of deck are not expected to be reused.
  - b. Removal of (3) W12x16 beams.
  - c. Removal of (3) deck support angles attached to the concrete beam that will be demoed.

- d. Removal of perimeter posts & safety cable.
- e. Installation of (2) new hand set face plates & epoxy anchors.
- f. Installation of (1) new hand set W18x35 beam.
- g. Installation of (3) new hand set W12x16 beams.
- h. Installation of new hand set deck sheets.
- i. Installation & welding of 21' of glass handrail support angle.
- j. Installation of perimeter posts & safety cable.
- k. Installation of new welded shear studs
- 3. All work associated with this CCA will be handwork, as there is no access for cranes or equipment.
- 4. Demo of concrete beam by others.
- 5. Because there will be work by others between our demo and reinstallation activities, Midwest Steel would like to complete our portion of the demo prior to our demobilization around the end of January 2025. If that is not possible, then this pricing assumes that there will be other comeback work available to our crew during the extent of activities by others.
- 6. Fire watch is included for the hot work. The hours for firewatch are incorporated into the JTW hours.
- 7. This quote is based on all the conditions of the base contract work.

We thank you for the opportunity to submit our quotation and we look forward to a contract change order for this work.

Sincerely,

Carly Mansfield Project Manager

Stone Bridge Iron & Steel, Inc. 426 Purinton Rd. Gansevoort, NY 12831

Attn: Mr. Brian Carmer

RE: Airport Terminal Expansion

Albany, NY

BP-02 - CCA-044 - ASI-104 - Added Channels at C-Line L3 & Roof - Rev 1

Dear Mr. Carmer,

We are pleased to submit our quotation for scope changes per the documents issued with ASI-104 for the above referenced project.

Pricing Impact: \$17,498

Schedule Impact: (5) days to install new channels second pass including field welded

connection material, field weld added WT7 second pass, and span deck to the existing C-line beam. Schedule impact assumes 8hr

work days.

This quotation is based on the following:

- 1. ASI-104 Design Drawing Release dated 1/27/25
- 2. Scope of work includes:
  - a. Seq. 8 (second pass, handwork):
    - i. Install scaffolding to access the L3 and Roof steel for installation of shear tabs and added channels. Remove scaffolding when complete.
    - ii. Field weld (20) shear tab connections for (10) added channels in Seq. 8. Per ASI, connections for C12 to C12 to be per 3/8E08, and connections for C12 to W sections to be per D/8E06. These require 18" of 1/4" fillet weld each shear tab.
    - iii. Install (6) channels in L3 and (4) channels in the Roof.

- iv. Install (1) WT7x54.5 welded to the bottom of the WT5x44 previously installed. Due to the same access issues that occurred with the installation of the WT5, all weld will have to be from the south. Therefore, we assume that the PJP weld used for installation of the WT5 will also be approved for use here. Reference A/8E06.
- v. Remove previously installed studs from grid 7-7.5/C-XE and remove deck. Install new deck to the existing C-line beam instead of the existing bent plate that it is currently attached to. Re-pin and re-stud the deck. Note, the existing deck cannot be reused due to the holes that will be created by removing the existing studs.
- vi. Install (42) new shear studs at the add C12 channels.
- b. Seq. 10 (first pass, crane work):
  - i. Add (2) C12 channels and (2) L3 angles.
- c. All work associated with Seq. 8 in this CCA will be second pass handwork, as the Seq. 1-8 steel is already erected and there is no access for cranes or equipment. All work associated with Seq. 10 in this CCA is assumed to be incorporated by the detailer and fabricator and will be able to be erected first pass with Seq. 10.
- d. All demo and foundation drawings included in ASI-104 release are excluded as no structural steel work is shown.
- e. Midwest Steel will shortly be demobilized from site. We will return to site to complete this work when all of the required demo is completed by MLB and the area is fully available to us for the week of work.
- 3. Fire watch is included for the hot work.
- 4. This quote is based on all the conditions of the base contract work.

We thank you for the opportunity to submit our quotation and we look forward to a contract change order for this work.

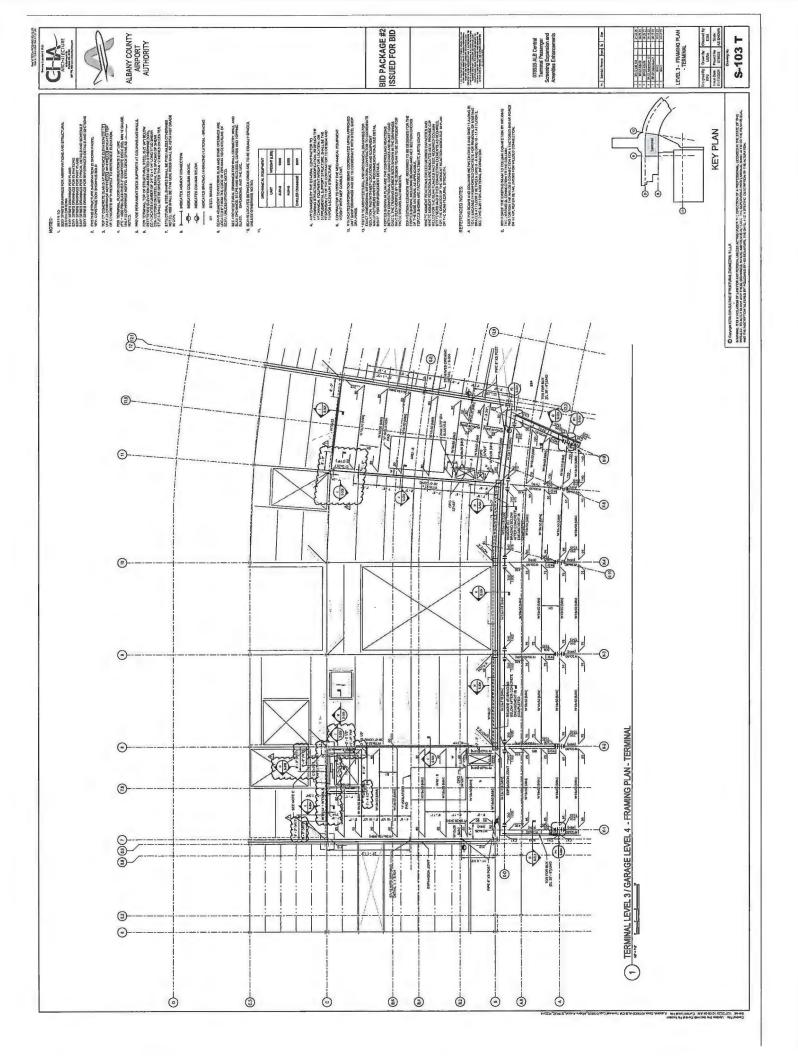

Sincerely,

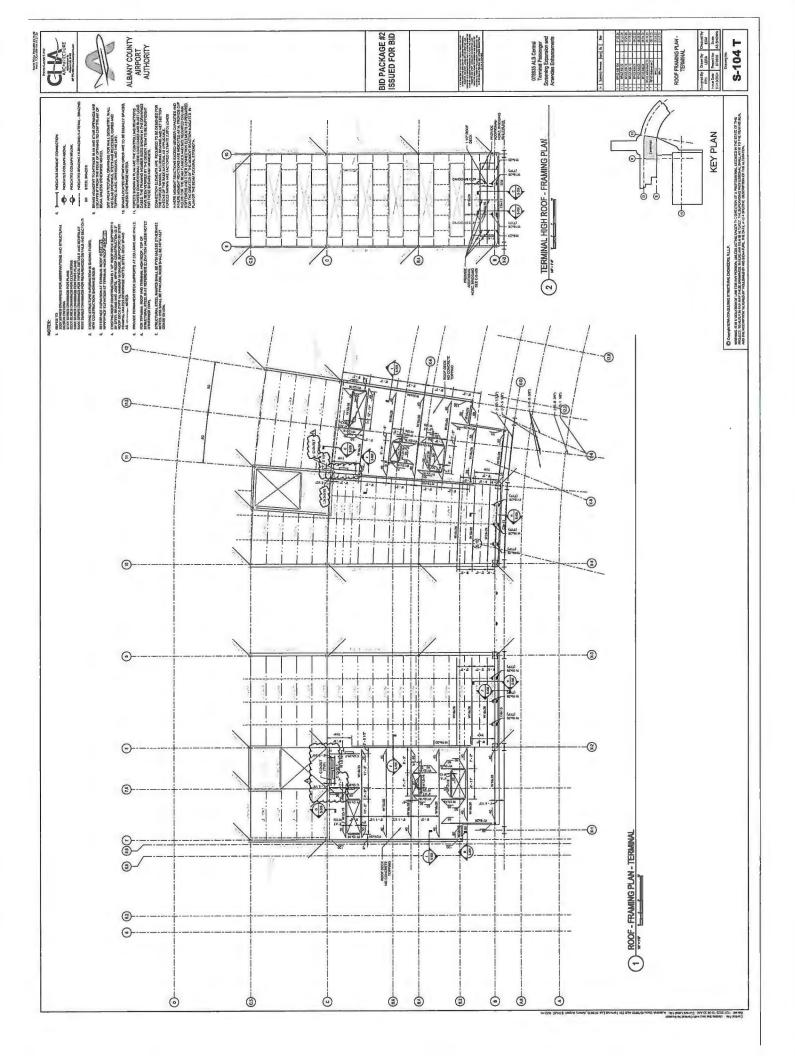

Carly Mansfield Project Manager

#### EXTERNAL EMAIL -- Please Handle Cautiously

I understand Rob is off today but we need someone from Turner to approve this extra cost so we can get the rebar

This isn't a large amount but we have too many outstanding change orders to keep going on our own. Our subcontractors and suppliers have too many outstanding change orders and they are not willing to keep going without a commitment.

If we don't get a change order to AAA/Nucor this afternoon we will not be able to get the rebar we need for the grade beams.

Can someone please review and commit to this extra please?

Jeff Lino

Summary of Rel.0042 on Dwg.R09-Rev.6:

Mark #7F30 replaces the top bar #7F11 in Detail-D (Lower left corner).

Mark #7F29 replaces the top bar #7F10 in Detail-D.

Mark #7F34 replaces top bar #7F14

Mark #4F16 replaces #4F08 typically throughout the drawing.

Mark #4F24 are new added drill & grout dowel.

Straight #4 x 5'-2" are new added vertical bars.

I have asked the Detailer about Marks #7F35 and 7F37 that are added to Dwg.R09-Rev.6 but are not on the bar order. (I believe that these belong on the other side of the drawing break line, and are not required on Dwg.R09.)

Per NOC 108 dated 2/21/2025, MLB Construction Services LLC is pleased to present our proposal for the following:

This proposal includes the relocation and permanent install of the hydronic lines out and around Stair C. This was done because a temporary bypass as shown in the documents was not feasible during steel erection or acceptable to ACAA for operational purposes.

This proposal also includes the credit back for the temporary bypass as well as the demo T. Lemme Mechanical did not perform.

The credit back for the permanent pipe that will not be installed by Danforth will be submitted under BP-4.

#### Craig,

Please see attached. For the labor break down I credited you 8 hours for the bypass and 16 hours for the miscellaneous demo.

If that bypass was needed it would have required a very minimal GPM/flow due to the decreased load in the areas that were removed from the system.

#### Thank you

#### Aaron OBryan
